Company introduction

The Second Life Digital Technology (Shenzhen) Co. , Ltd, established in the 2021, has been working on 3D technology since 2013. It is one of the earliest independent manufacturers of 3D printers in China.

We has been focused on 3D technology industry research for ten years, and has the ability to independently develop and upgrade iteratively. We has obtained more than a dozen patents related to 3D printing in the industry, and is the technical partner of BYD in Shenzhen, responsible for its spare parts 3D scanning business, has the domestic top full-color printer supply chain industry resources.

The modeling team has served more than 100 real estate companies in VR reality project, the team leader in 2008 participated in the Beijing Olympic Games 3D visual effects production, responsible for the VR World Expo China Pavilion art scene construction.
